MY INTEGRUM NEW TOOLS FOR RESEARCHING RUSSIA AND THE CIS

MY INTEGRUM service offers its customers up-to-date online information on specific topics of interest to them: any and all aspects of political, economic, social and cultural life in Russia, the countries of the former Soviet Union and the world.

Each individual customer can customize **MY INTEGRUM** to meet his/her interests by setting up personal **Themes**. Each **Theme** is divided into sub-themes, or **Subjects**, set either by the customer himself/herself or by **Integrum's** personal customer manager. Then, all relevant data (**Lenta** or **news feeds**) and analytical materials are configured according to the pre-set **Themes** and **Subjects**. In addition to providing personal news feeds and performing independent searches through mass-media archives, **My Integrum** automatically monitors **Subjects** periodically (at intervals set by the user) and generates analytical reports with the assistance of the **Media analysis** tool. This research tool makes it possible to follow mass-media publication trends in **Themes** of interest to the user and arranges them by region, time interval, print run, audience and the ratio of negative to positive publications. The results can be presented in both table and graph formats.

The customer can select **News feeds** and **Media** analysis separately for Russian and English publications.

NEWS FEEDS

The News Feeds are updated and available online. The customer's monitor will therefore display a comprehensive compendium of the day's news relating to his/her **Themes** and **Subjects**. The news feeds are updated every hour. In addition to the online news feeds, the customer can request that the latest relevant publications be e-mailed hourly or daily.

MEDIA ANALYSIS

MY INTEGRUM's Media analysis tool provides analyses and generates readymade, formatted analytical **Reports**, all based on user-selected Themes.

The **Reports** may contain a selection of **full-text** mass media publications for a specified time period and/or analytical information in the form of charts and graphs using parameters set by the customer.

You can track documents relevant to your personal Themes and Objects as RSS feeds without having to visit our website

Испамизм в Дагестан

MEDIA ANALYSIS allows you:

- to view the ratio of positive to negative publications;
- to trace trends in mass media publications in all Subjects being monitored by the customer (once a day for weekly monitoring, once a week for monthly monitoring);
- to receive data on the mass media with the highest number (more than 2%) of publications relevant to the Subjects being monitored;
- to trace trends in mass media publications in all Subjects being monitored over a specific time period;
- to sort the publications by region;
- to evaluate the readership of selected publications.
