

INTEGRUM

ELECTRONIC PORTRAIT OF RUSSIA - NEW OPPORTUNITIES FOR RESEARCHERS!

UNIQUE SCOPE OF RESEARCH MATERIALS!

Today the Integrum database represents the most comprehensive archive of electronic information on Russia. For the beginning of the year 2010 Integrum consisted of 400 million documents in more than 5000 databases:

- full-text electronic versions of Russian central (300+) and regional (1700+) newspapers and magazines;
- the news from Russian and international news agencies (ITAR-TASS, RIA News);
- analytical researches and reviews;
- address, reference and legal databases;
- documents of Rospatent (Russian Patent and Trade Mark Office);
- statistical documents of Goskomstat (Federal State Statistic Service);
- full texts of thousands of Russian classical titles;
- and other useful information related to Russia.

Integrum database ensuring global monitoring of the Russian information space grows rapidly with more than 40000 documents added daily. Only Integrum can offer you such a broad scope of data on Russia.

UNIQUE SEARCH ENGINE!

The tool which effectively retrieves useful data in millions of documents is an original search system Artefact, developed by the leading Russian scientists. Today it represents the most accurate multilingual search engine with a developed algorithm of the coordinated morphological analysis.

OUR SUBSCRIBERS CAN MAKE USE OF:

- Russian-English, English-Russian, Russian-German, German-Russian dictionaries, as well as the "Big Soviet encyclopedia";
- search by all wordforms of all the words in the Russian language;
- any word can be simultaneously checked in 10 dictionaries – orthographical, the dictionary of difficult words, the thesaurus, the derivation dictionary, the dictionaries of synonyms, antonyms, accents, personal names etc.;
- automatic abstracting of documents – the system shows 3 sentences, which are more typical of the document discussed;
- automatic correcting of misprints;
- search by title, author, publication date etc.

UNIQUE RESEARCH TOOLS FOR INFORMATION ANALYSIS!

Integrum database offers infinite opportunities for conducting research on Russia. Here are some of them:
