

Integrum represents great interest for researchers of Russian social, political and economic life as the most comprehensive electronic archive of information on Russia.

Integrum databases contain Russian central (more than 300) and regional (more than 1700) newspapers and magazines, teletypes of the leading information agencies, analytical and statistical bulletins, texts of laws and decrees, addresses and phones databases, full texts of Russian classic literary works. Moreover, you can find information from the libraries of *Rospatent*, *the Scientific Information Institute on the Social Sciences of the Russian Academy of Sciences*, *Agroprom*, *Russian State Archive of Literature and Art*, *Russian Book Chamber*, *Russian National Public Library for Science and Technology*.

The database *Central Press* is the core of Integrum collection and includes such reliable and authoritative newspapers and magazines as «*Izvestiia*», «*Moskovskii komsomolets*», «*Itogi*», «*Vremia novostei*», «*Kommersant*», «*Trud*», «*Obozrevatel*», «*Vedomosti*», «*Moskovskaia pravda*», «*Moscow Times*», «*Moscow News*» and so on. The archives of many editions go back as far as the beginning of the 1990s and the most recent issues of many of newspapers and magazines are available at Integrum even before they appear in the press.

**Integrum** is not only the unique collection of the databases, but a set of professional search and analytical tools for the Russian mass media monitoring. Due to the modules of the coordinated morphological search Integrum's search engine allows defining the criteria of documents search and selection in the most accurate way. Additional search tools permit you to conduct the research of political, economic aspects of life in Russia:

- The information search tool **Teletype** will enable you to obtain hot news from a wide range of agencies in real time using a unified interface.
- The service **People today** is an automatically renewed list of 100 people most often mentioned in press during the day.
- The **Who? Where? When?** service allows finding data on the place of work and position of a certain person.
- **Comparative and relative statistics** are used for comparative and relative comparison of the mass media hits for similar and competitive objects. For example, you can track down the number of references to Boris Pasternak and Michael Lomonosov in connection with the German town Marburg, where they both studied.

The additional service **Integrum™ Companies** will enable you to get access to the statistical information and financial accounts of the first-rate Russian enterprises, view credit, analytic and marketing company profiles and study the corporate structure of a company.

You now have 3 easy ways to keep up with information from Integrum: [Facebook](#), [Twitter](#) and [Youtube](#).
